## DT15 Rec'd PCT/PTO 30 NOV 2004

## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

APPLICANT: JACQUINOT, Daniel

SERIAL NO.: (International Appn No. PCT/FR03/001829)

FILED: Herewith (Intl. Filing Date 17 June 2003)

TITLE: MULTIBAND PLANAR ANTENNA

## PRELIMINARY AMENDMENT

Commissioner for Patents P. O. Box 1450 Alexandria, VA 22313-1450

## Preliminary Amendment: SPECIFICATION AMENDMENTS

In Paragraphs [0031] to [0034], please amend the paragraphs as follows:

[0031] - figure Figure 1 is a schematic and cross-sectional view according to the electric plane of polarization (plane E) of a planar patch antenna without parasitic element according to the invention:

[0032] - figure Figure 2 is a schematic plan view of the radiator,

[0033] - figure Figure 3 is a schematic plan view of a planar antenna according to the invention the radiator of which is topped by a parasitic element;

[0034] - figure Figure 4 is a perspective view of the antenna according to the invention.

In Paragraph [0052], please amend the paragraph as follows:

[0052] If we now consider the example of the reception of the digital and/or analogue terrestrial television signals is now considered, extending in a frequency range between 474 and 862 MHz, the tests of an antenna according to the invention and to the dimensional characteristics given below have shown that it is capable of covering this frequency range with an optimal gain.
